

NIST SP 800-53 Rev 5 control PT-8 (Computer Matching Requirements) is assessed by examining, interviewing, and testing: PT-8 · Computer Matching Requirements Control Statement: When a system or organization processes information for the purpose of conducting a matching program: a. Obtain approval from the Data Integrity Board to conduct the matching program; b. Develop and enter into a computer matching agreement; c. Publish a matching notice in the Federal Register; d. Independently verify the information produced by the matching program before taking adverse action against an individual, if required; and e. Pr

NIST SP 800-53 Rev 5 control PT-7.1 (Social Security Numbers) is assessed by examining, interviewing, and testing: PT-7.1 · Social Security Numbers Control Statement: When a system processes Social Security numbers: (a) Eliminate unnecessary collection, maintenance, and use of Social Security numbers, and explore alternatives to their use as a personal identifier; (b) Do not deny any individual any right, benefit, or privilege provided by law because of such individual's refusal to disclose his or her Social Security number; and (c) Inform any individual who is asked to disclose his or her Social Security n

NIST SP 800-53 Rev 5 control PT-5.2 (Privacy Act Statements) is assessed by examining, interviewing, and testing: PT-5.2 · Privacy Act Statements Control Statement: Include Privacy Act statements on forms that collect information that will be maintained in a Privacy Act system of records, or provide Privacy Act statements on separate forms that can be retained by individuals. Supplemental Guidance: Include Privacy Act statements on forms that collect information that will be maintained in a Privacy Act system of records, or provide Privacy Act statements on separate forms that can be retained by individua

NIST SP 800-53 Rev 5 control PT-8 (Computer Matching Requirements) summarizes the requirements for this control: PT-8 · Computer Matching Requirements Control Statement: When a system or organization processes information for the purpose of conducting a matching program: a. Obtain approval from the Data Integrity Board to conduct the matching program; b. Develop and enter into a computer matching agreement; c. Publish a matching notice in the Federal Register; d. Independently verify the information produced by the matching program before taking adverse action against an individual, if required; and e. Pr

Control PT-4: e in how their personally identifiable information is being processed at the time or in conjunction with specific types of data processing when such participation may be most useful to the individual. Individual assumptions about how personally identifiable information is being processed might not be accurate or reliable if time has passed since the individual last gave consent or the type of processing creates significant privacy risk. Organizations use discretion to determine when to use just-in-time consent and may use supporting information on demographics, focus groups, or surveys to learn more about individuals' privacy interests and concerns. Related Controls: PT-2. (3) CONSENT | REVOCATION Implement [Assignment: organization-defined tools or mechanisms] for individuals to revoke consent to the processing of their personally identifiable information. Discussion: Revocation of consent enables individuals to exercise control over their initial consent decision when circumstances change. Organizations consider usability factors in enabling easy-to-use revocation capabilities. Related Controls: PT-2. References: [PRIVACT], [OMB A-130], [SP 800-63-3].

NIST SP 800-53 Rev 5 control PT-3 (Personally Identifiable Information Processing Purposes) is assessed by examining, interviewing, and testing: PT-3 · Personally Identifiable Information Processing Purposes Control Statement: a. Identify and document the [organization-defined parameter] for processing personally identifiable information; b. Describe the purpose(s) in the public privacy notices and policies of the organization; c. Restrict the [organization-defined parameter] of personally identifiable information to only that which is compatible with the identified purpose(s); and d. Monitor changes in processing personally identifiabl

NIST SP 800-53 Rev 5 control PT-5.1 (Just-in-time Notice) is assessed by examining, interviewing, and testing: PT-5.1 · Just-in-time Notice Control Statement: Present notice of personally identifiable information processing to individuals at a time and location where the individual provides personally identifiable information or in conjunction with a data action, or [organization-defined parameter]. Supplemental Guidance: Present notice of personally identifiable information processing to individuals at a time and location where the individual provides personally

identifiable information or in conjunct

NIST SP 800-53 Rev 5 control PT-5.1 (Just-in-time Notice) summarizes the requirements for this control: PT-5.1 · Just-in-time Notice Control Statement: Present notice of personally identifiable information processing to individuals at a time and location where the individual provides personally identifiable information or in conjunction with a data action, or [organization-defined parameter]. Supplemental Guidance: Present notice of personally identifiable information processing to individuals at a time and location where the individual provides personally identifiable information or in conjunct

NIST SP 800-53 Rev 5 control PT-7.2 (First Amendment Information) summarizes the requirements for this control: PT-7.2 · First Amendment Information Control Statement: Prohibit the processing of information describing how any individual exercises rights guaranteed by the First Amendment unless expressly authorized by statute or by the individual or unless pertinent to and within the scope of an authorized law enforcement activity. Supplemental Guidance: Prohibit the processing of information describing how any individual exercises rights guaranteed by the First Amendment unless expressly authorized by s

PT-2.2 · Automation Control Statement: Manage enforcement of the authorized processing of personally identifiable information using [organization-defined parameter]. Supplemental Guidance: Manage enforcement of the authorized processing of personally identifiable information using [organization-defined parameter]. Automated mechanisms augment verification that only authorized processing is occurring.

NIST SP 800-53 Rev 5 control PT-4 (Consent) is assessed by examining, interviewing, and testing: PT-4 · Consent Control Statement: Implement [organization-defined parameter] for individuals to consent to the processing of their personally identifiable information prior to its collection that facilitate individuals· informed decision-making. Supplemental Guidance: Implement [organization-defined parameter] for individuals to consent to the processing of their personally identifiable information prior to its collection that facilitate individuals· informed decision-making. Consent allows in

NIST SP 800-53 Rev 5 control PT-7 (Specific Categories of Personally Identifiable Information) is assessed by examining, interviewing, and testing: PT-7 · Specific Categories of Personally Identifiable Information Control Statement: Apply [organization-defined parameter] for specific categories of personally identifiable information. Supplemental Guidance: Apply [organization-defined parameter] for specific categories of personally identifiable information. Organizations apply any conditions or protections that may be necessary for specific categories of personally identifiable information. These conditions may be required by laws, execut

3.3.5 RTCA 356 3. 3.3.5 SEC 613 || PT-2: Removable media is protected, and its use restricted according to policy. 3.3.5, 7.

NIST SP 800-53 Rev 5 control PT-4 (Consent) summarizes the requirements for this control: PT-4 · Consent Control Statement: Implement [organization-defined parameter] for individuals to consent to the processing of their personally identifiable information prior to its collection that facilitate individuals· informed decision-making. Supplemental Guidance: Implement [organization-defined parameter] for individuals to consent to the processing of their personally identifiable information prior to its collection that facilitate individuals· informed decision-making. Consent allows in

NIST SP 800-53 Rev 5 control PT-4.2 (Just-in-time Consent) summarizes the requirements for this control: PT-4.2 · Just-in-time Consent Control Statement: Present [organization-defined parameter] to individuals at [organization-defined parameter] and in conjunction with [organization-defined parameter]. Supplemental Guidance: Present [organization-defined parameter] to individuals at [organization-defined parameter] and in conjunction with [organization-defined parameter]. Just-in-time consent enables individuals to participate in how their personally identifiable information is being processed at

NIST SP 800-53 Rev 5 control PT-2.1 (Data Tagging) summarizes the requirements for this control: PT-2.1 · Data Tagging Control Statement: Attach data tags containing [organization-defined

parameter] to [organization-defined parameter]. Supplemental Guidance: Attach data tags containing [organization-defined parameter] to [organization-defined parameter]. Data tags support the tracking and enforcement of authorized processing by conveying the types of processing that are authorized along with the relevant elements of personally identifiable information throughout the system. Data tags may

NIST SP 800-53 Rev 5 control PT-3.2 (Automation) summarizes the requirements for this control: PT-3.2 · Automation Control Statement: Track processing purposes of personally identifiable information using [organization-defined parameter]. Supplemental Guidance: Track processing purposes of personally identifiable information using [organization-defined parameter]. Automated mechanisms augment tracking of the processing purposes.

NIST SP 800-53 Rev 5 control PT-1 (Policy and Procedures) is assessed by examining, interviewing, and testing: PT-1 · Policy and Procedures Control Statement: a. Develop, document, and disseminate to [organization-defined parameter]: 1. [organization-defined parameter] personally identifiable information processing and transparency policy that: 2. Procedures to facilitate the implementation of the personally identifiable information processing and transparency policy and the associated personally identifiable information processing and transparency controls; b. Designate an [organization-defined par

NIST SP 800-53 Rev 5 control PT-6 (System of Records Notice) is assessed by examining, interviewing, and testing: PT-6 · System of Records Notice Control Statement: For systems that process information that will be maintained in a Privacy Act system of records: a. Draft system of records notices in accordance with OMB guidance and submit new and significantly modified system of records notices to the OMB and appropriate congressional committees for advance review; b. Publish system of records notices in the Federal Register; and c. Keep system of records notices accurate, up-to-date, and scoped in accordan

NIST SP 800-53 Rev 5 control PT-7 (Specific Categories of Personally Identifiable Information) is defined as follows: PT-7 · Specific Categories of Personally Identifiable Information Control Statement: Apply [organization-defined parameter] for specific categories of personally identifiable information. Supplemental Guidance: Apply [organization-defined parameter] for specific categories of personally identifiable information. Organizations apply any conditions or protections that may be necessary for specific categories of personally identifiable information. These conditions may be required by laws, executive orders, directives, regulations, policies, standards, or guidelines. The requirements may also c

NIST SP 800-53 Rev 5 control PT-7 (Specific Categories of Personally Identifiable Information) summarizes the requirements for this control: PT-7 · Specific Categories of Personally Identifiable Information Control Statement: Apply [organization-defined parameter] for specific categories of personally identifiable information. Supplemental Guidance: Apply [organization-defined parameter] for specific categories of personally identifiable information. Organizations apply any conditions or protections that may be necessary for specific categories of personally identifiable information. These conditions may be required by laws, execut

NIST SP 800-53 Rev 5 control PT-4.1 (Tailored Consent): PT-4.1 · Tailored Consent Control Statement: Provide [organization-defined parameter] to allow individuals to tailor processing permissions to selected elements of personally identifiable information. Supplemental Guidance: Provide [organization-defined parameter] to allow individuals to tailor processing permissions to selected elements of personally identifiable information. While some process

NIST SP 800-53 Rev 5 control PT-7.2 (First Amendment Information) is assessed by examining, interviewing, and testing: PT-7.2 · First Amendment Information Control Statement: Prohibit the processing of information describing how any individual exercises rights guaranteed by the First Amendment unless expressly authorized by statute or by the individual or unless pertinent to and within the scope of an authorized law enforcement activity. Supplemental Guidance: Prohibit the processing of information describing how any individual exercises rights guaranteed by the First Amendment unless expressly authorized by s

NIST SP 800-53 Rev 5 control PT-6 (System of Records Notice) summarizes the requirements for this

control: PT-6 · System of Records Notice Control Statement: For systems that process information that will be maintained in a Privacy Act system of records: a. Draft system of records notices in accordance with OMB guidance and submit new and significantly modified system of records notices to the OMB and appropriate congressional committees for advance review; b. Publish system of records notices in the Federal Register; and c. Keep system of records notices accurate, up-to-date, and scoped in accordance

NIST SP 800-53 Rev 5 control PT-2 (Authority to Process Personally Identifiable Information) is assessed by examining, interviewing, and testing: PT-2 · Authority to Process Personally Identifiable Information Control Statement: a. Determine and document the [organization-defined parameter] that permits the [organization-defined parameter] of personally identifiable information; and b. Restrict the [organization-defined parameter] of personally identifiable information to only that which is authorized. Supplemental Guidance: a. Determine and document the [organization-defined parameter] that permits the [organization-defined parameter]

NIST SP 800-53 Rev 5 control PT-6.2 (Exemption Rules) is assessed by examining, interviewing, and testing: PT-6.2 · Exemption Rules Control Statement: Review all Privacy Act exemptions claimed for the system of records at [organization-defined parameter] to ensure they remain appropriate and necessary in accordance with law, that they have been promulgated as regulations, and that they are accurately described in the system of records notice. Supplemental Guidance: Review all Privacy Act exemptions claimed for the system of records at [organization-defined parameter] to ensure they remain appropriate

NIST SP 800-53 Rev 5 control PT-3.1 (Data Tagging) is assessed by examining, interviewing, and testing: PT-3.1 · Data Tagging Control Statement: Attach data tags containing the following purposes to [organization-defined parameter]: [organization-defined parameter]. Supplemental Guidance: Attach data tags containing the following purposes to [organization-defined parameter]: [organization-defined parameter]. Data tags support the tracking of processing purposes by conveying the purposes along with the relevant elements of personally identifiable information throughout the system. By conveying th
